Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE Three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Office Action Summary

DETAILED ACTION

Election/Restriction

1. The election of species requirements have been withdrawn. The Examiner reserves the right to reinstate them.

Claim Rejections - 35 USC § 112

2. Claims 122-146 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 122, it is unclear what minimal conventional components constitute "*a gasification system.*" Failure to specify the minimal components constituting "*a gasification system,*" leaves potential infringers in the dark as to this limitation, and thus, the claims are not seen to comply with the *notice* requirement.

As used in the various claims, the term "*buffer*" is not understood in the context used. Clarification is required.

Claim Rejections - 35 USC § 102

3. Claims 122-123, 126-129 are rejected under 35 U.S.C. 102(b) as being anticipated by Janka et al. (4,701,266).

Janka et al. disclose a lockhopper for use with a gasification system - see column 6, line 42. Regarding claim 128, see column 5, lines 5-35, where the "*liquid collection volume*" is seen

Art Unit: 1724

to constitute a *"buffer."* With respect to claim 129, the *"pressurized reaction vessel"* (col. 4, line 3) is seen to constitute the *"buffer."*

Claim Rejections - 35 USC § 103

4. Claims 124-125 and 130-146 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teachings of Janka et al. (4,701,266) and AAPA (Applicant's Admitted Prior Art).

AAPA discusses the prior art at pages 1-5 of the instant specification, as well as illustrating it in Fig. 1. Janka et al. do not expressly disclose the use of pressurized gases as a motive force nor a valve at the outlet of the conveying lockhopper. It is submitted that the use of differing pressures and use of "on hand" gases to force the fluid through the system and/or pressurize it, would have been obvious, since this is the manner that conventional systems operate as discussed by AAPA.

Drawings

5. Figure One should be designated by a legend such as --**Prior Art**-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. **The objection to the drawings will not be held in abeyance.**

Specification

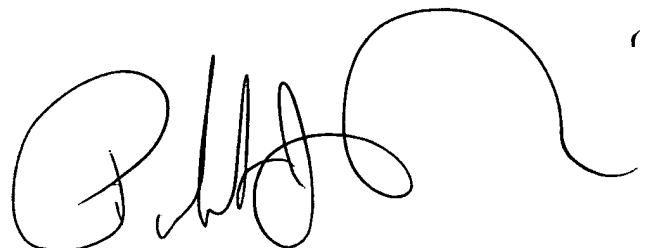

6. The use of the trademarks in this application is again noted. They should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner R. Popovics whose telephone number is (703) 308-0684.
